Dear Professor Piechowski,

I hope this message finds you well.

Following your previous kind guidance, I contacted the Gifted Development Center twice regarding the permission process; however, I have not yet received a response. Therefore, I want

In our research, we intend to use the 50-item Likert-type version of the OEQ-II (consisting of 10 items for each overexcitability, rated on a 5-point Likert scale). My graduate student plans to  
For clarity, I am attaching a copy of the exact version of the OEQ-II for which I am requesting permission.

I reviewed the study you previously recommended (Yakmacı-Güzel), but as you know, that work employs the open-ended OEQ form, which differs from the Likert-type OEQ-II we aim to use. Advanced Development, 1999) is essential for us.

This process has also become time-sensitive, as the delay in obtaining approval is affecting my student's data collection schedule and may jeopardize the timely completion of her thesis. I  
as one of the developers of the scale?

Thank you very much for your time, understanding, and support.

Warm regards,

**Dr. Pelin Ertekin**

Assistant Professor

Department of Gifted Education

Inonu University, Turkey

Dear Professor Peterkin,

It's good to hear from you. It's a pity that you are not going to use the open-ended OEQ because it offers a look at the content of the responses that makes for very rich data.

Is there a Turkish translation of the OEQ-II or do you still have to make one?

No doubt you are familiar with Gallagher's research using cutoff scores, right? This approach makes more sense of OE findings than previous mean scores.

You have an older edition of the manual. I am enclosing the second edition of the Manual and OEQ-II as well as Gallagher's paper, just in case.

You have my permission to use the OEQ-II. Let me know whether you have the Turkish version of the OEQ-II or if you still have to make the translation.

Warm regards,

Michael M. Piechowski
